

***WHEN YOU
NEED A STRATEGIC
PARTNER WHO GETS
YOUR PROJECT, YOU NEED***

Speedy Hire Temporary Site Services

Speedy Hire Temporary Site Services offers the ultimate in temporary site set up.

Speedy Hire has been supplying the UK's largest construction and infrastructure companies with the highest quality hire service for nearly 50 years. Focusing on every aspect of your specific requirements, we work from the outset to plan and specify equipment, arrange all elements of the install process, manage maintenance requirements and de-rig the site on completion. Our expert team are with you every step of the way. All backed up with market-leading investment in product, storage and logistics there is no better partner for your temporary site requirements.

We partner with over 30 major brands to ensure we offer only the highest quality tools and equipment.

Strategically located, dedicated UK fulfilment centres ensure the ***fastest and most efficient delivery possible.***

*When you need a dedicated service backed up by specialist support, you need **Speedy Hire.***

From the smallest requirements to the largest, we have a dedicated site team ready to work collaboratively with you to design the most efficient, effective and personalised solution for your temporary site infrastructure.

At TSS we think of ourselves as an extension of your project team, giving you peace of mind that no matter the requirement in planning and supply or what happens on site, we're there to respond to your needs.

Our dedication to the provision of only the highest quality service doesn't stop with our people and products. We have invested in, and are continuing to invest in, strategically located dedicated fulfilment centres around the UK. These sites will act as 'hubs' for our huge stockholding and will make the call-off and delivery of your orders faster and more efficient than any comparative service in the UK. Combined with electric and hybrid delivery vehicles and environmentally route management, the strategic positioning of these fulfilment centres will also drastically reduce carbon emissions.

*With 24/7 support for all pre-planned works, our dedicated team of site services experts are **ready to help with any requirement, large or small.***

*When you need install, maintenance and de-rig, you need **us.***

It's one thing to have a market leading product offering but we back up this unrivalled product availability with install crews to match.

Our crew provide a fully managed installation service to co-ordinate the smooth and safe set up of your site. Throughout the life of your site, our support team are on hand 365 24/7 to answer, and deal with, any ongoing maintenance requirements and at the end of its life, our crew will be back with you to de-rig and remove. Another demonstration of this truly end-to-end service.

We have highly skilled installation, maintenance and de-rig teams with experience across many industry sectors.

*When you need the ultimate in construction site compounds and site infrastructure, you need **us.***

Let's face it, at Speedy Hire, we've been supplying the construction industry with all the equipment and tools it's required for nearly 50 years now. It's safe to say, we understand the exacting requirements of today's construction environments.

Whether a more 'traditional' construction set up such as house building or a more specialist requirement demonstrated in other sectors like rail or ground testing our highly experienced project management team understand the detail that will be required in developing plans and designs for your temporary sites. We're there to deliver the highest quality, sustainable kit and are on hand at every stage of the project to ensure the site is installed to the highest standards, maintained across its lifetime and removed at the end of its use. A truly specialised, end-to-end temporary site service with the experience and knowledge you need to support you every step of the way.

No hire company in the UK has more experience in the management and supply of tools and equipment to the construction industry.

*When you need to manage hundreds of thousands of people and keep them all safe, you need **Speedy Hire.***

Whether it's an outdoor festival, a city centre event or a stadium extravaganza ***Speedy Hire has the experience and expertise to deliver to your unique and specific requirements.***

For many years Speedy Hire has specialised in bringing the highest quality infrastructure products to the biggest festivals and events across the UK.

From the country's biggest Christmas markets to the world's biggest music festivals, whether stadium events or in the great outdoors – you will always find Speedy Hire. With Temporary Site Services, we are now taking that reliability and experience to the next level.

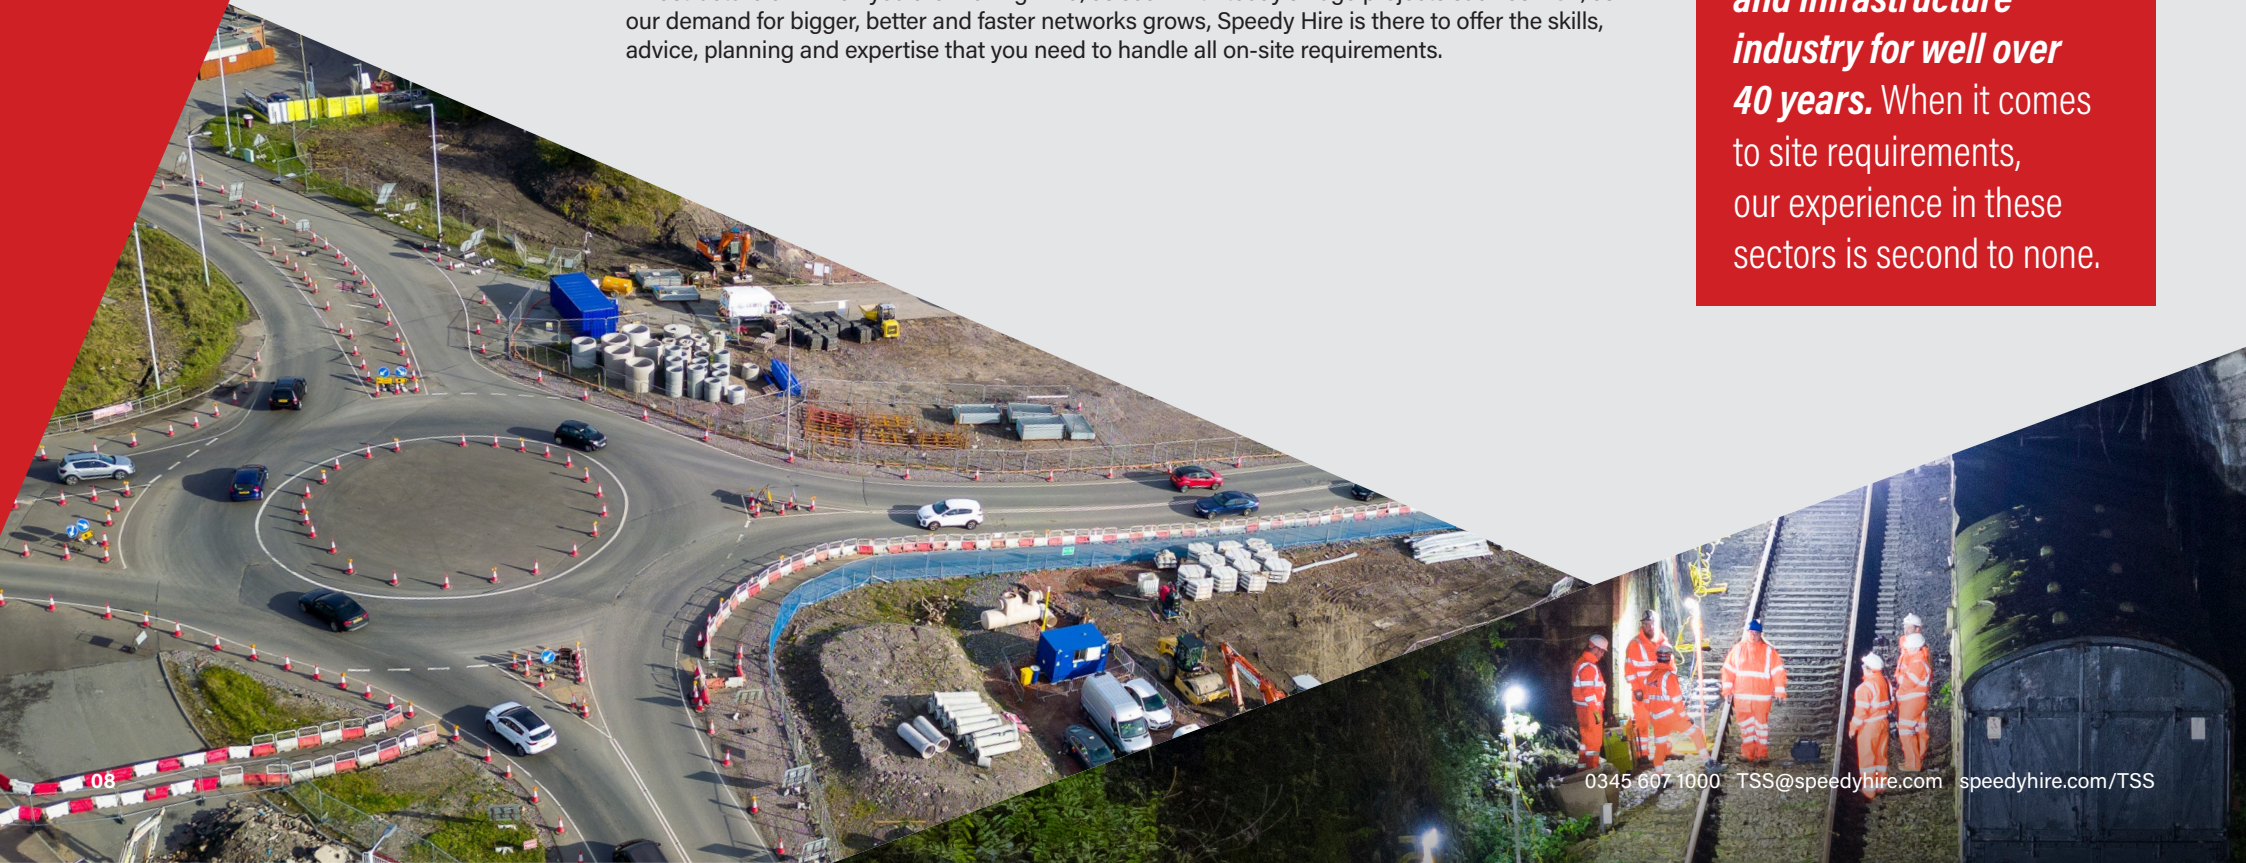

Our dedicated project management specialists have the ability to help your teams plan, design, install, maintain and de-rig the most complex site requirements. Combine this with the ultimate in sustainable credentials at both a product, logistic and personnel level, and you'd be hard pushed to find a more holistic and more experienced temporary site services provider than Speedy Hire.

*When you need a site service that moves as fast as your infrastructure projects, you need **Speedy Hire**.*

Airports or airfields, trackside or stations, local highways or national motorway network.

However we travel these days, you can bet Speedy Hire had some involvement in building the infrastructure on which you are moving. And, as seen with today's huge projects such as HS2, as our demand for bigger, better and faster networks grows, Speedy Hire is there to offer the skills, advice, planning and expertise that you need to handle all on-site requirements.

We have specialised in servicing the transport and infrastructure industry for well over 40 years. When it comes to site requirements, our experience in these sectors is second to none.

*When you need the power to deliver your bespoke site requirements, you need **us.***

Whether at a local level, with ongoing maintenance of utility networks, or supporting national initiatives to drive the construction and installation of more renewable energy production in some of the most remote areas of the UK, the Speedy Hire Temporary Site Services team have the energy, dedication and expertise to plan, deliver and maintain even the most complex of site requirements.

Delivered by one of the UK's largest hire companies, we can ensure that every detail of your site requirements is considered. Couple that with our specialist installation and de-rig teams and you have the perfect partner for the end-to-end provision of your complete site.

Hydro-electric, nuclear, gas, electric, wind, solar...

wherever there's the energy, there is the power of Speedy Hire for your temporary site services.

When you need a strong, seamless, heavy duty access road, you need UltraTrack Pro

With its cutting-edge, overlapping design that creates stronger, leak-proof surfaces UltraTrack Pro is the ultimate in versatile, safe ground coverage.

The interlocking joints provide increased weight distribution and eliminate the risk of damage to vehicles or equipment whilst the overlapping design significantly reduces mud seepage onto the mat.

Where temporary roads, compounds, storage areas or work platforms may be required UltraTrack is the perfect solution in any industry sector: from construction, civil engineering and utilities to forestry, events and the renewable energy, wind and solar sector.

Material: Recycled HDPE and fully recyclable

Overall Size: 3m x 2.5m x 38mm

Surface Size: 285cm x 235cm

Surface Area: 6.7m²

Weight: 295kg

Tread: Dual tread design for tyre-equipped vehicles and steel-tracked vehicles

Connectors: Standard M16 bolts. Steel reinforced connection points

Interlocking joints

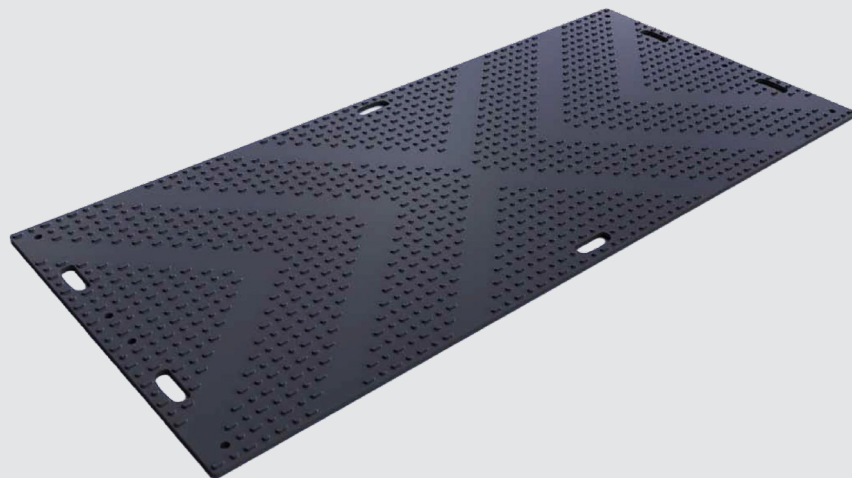

Ground Protection 8 x 4 Panel

This heavy duty Euromat has a Chevron traction® surface nub design for maximum grip, designed to be used as a temporary road surface for traffic and pedestrians where ground protection is essential, it has a load capacity of 80 tonnes.

A simple fixing system makes installation quick and easy and the mats are produced from 100% recycled materials.

Features and Benefits

- 100% recycled material
- 4 fixing points per mat
- Installed fast and easily by 2 people with the use of hand-held cut outs
- Load performance depends on ground conditions as well as the weight and types of vehicles and plant
- Load capacity of 80 tons

MaxiTrack Panel

The Maxi Track is designed as a heavy-duty trackway system.

The mats are strong with overlapping lipped connectors providing maximum support and mud suppression.

Ideally suited to heavy duty vehicles, they are suitable for both rubber tracked or tyred vehicles. The mats are easy to install and ideal for creating trackways on any construction site or where vehicular access is required across soft or vulnerable surfaces.

Features and Benefits

- Easy to install and connect
- 40kg two-person lift
- Tough mats support extremely heavy loads
- Suitable for use with rubber tracked or tyred vehicles, and military vehicles with rubber track pads
- No cranes or specialist lifting equipment required

Grass Mat 1200 x 800

The Ground Guards Grass Mat is designed as easy to lay flooring that features integral interlocking lips to enable smooth joins without trip hazards.

Ideally suited for a wide range of applications including marquee flooring, footpaths, construction site walkways, factory and warehouse flooring, equestrian and livestock flooring. Can also be used as a temporary car park on firm paved or crushed surfaces.

Features and Benefits

- Anti-slip surface
- Integral interlocking lips enable smooth joins
- Gentle edging ramps provide a safe transition to ground level
- Made from 100% recycled PVC

Xtreme Mat 4m x 2m

Manufactured from 100% recycled plastic XtremeMat is also fully recyclable.

A truly sustainable solution that provides access for heavy traffic and machinery across soft and unstable ground. Perfect for creating access solution across many sectors including: housebuilding, construction, civil engineering, infrastructure and events. Xtreme Mat has a buoyant inner core for use across boggy ground and through swamps along with overlapping joints to spread heavy loads for extra safety and stability and can be laid in any direction for versatile site layouts.

Features and Benefits

- Made from ultra-tough HDPE
- Large 4 x 2 metre mat size for creating substantial access roads
- Hard foam inner core provides buoyancy, allowing the mats to float and create roadways over boggy ground, through swamps and even floating on water.
- Overlapping flange joints give total support on soft ground
- Suitable for a wide range of vehicles types

Maximum Safety Crash Barrier

This robust and highly capable crash tested traffic separator is a versatile, yet strong and flexible one piece water fillable system that can be handled and installed without the need for heavy lifting machinery.

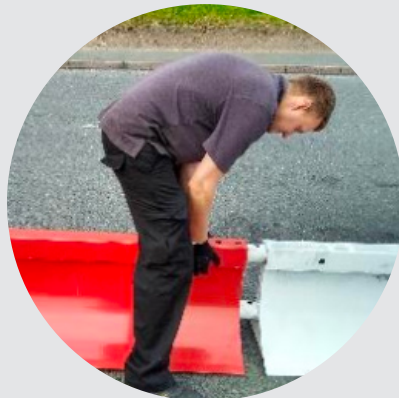

Xtreme Mat Ramp

Designed for use with Xtreme Mat product, the Xtreme Mat ramp is the perfect solution for seamless, smooth access onto surface matting.

Fortis Barrier

This rugged steel barrier solution for traffic delineation has MIRA tested T2 W6 rating and comes powder coated in red and white units for visibility. The units simply slot together and are held in place with a simple steel pin.

Fortis Barrier Mesh

Designed for use with the Utility barrier base, this rugged steel mesh barrier simply slots into the base to create an effective pedestrian barrier.

How we work

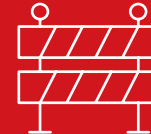

PLANNING THE PERFECT SITE SET-UP

Our job is to provide your perfect solution. We do this by understanding our customers and the markets in which they work. From the smallest construction site to largest rock festival we can help to plan, develop and deliver the perfect site solution.

COMPREHENSIVE SITE SURVEY

An initial survey by our site services team will help you determine your exact requirements, we can then scope out every piece of equipment required (whether large or small) to deliver on the agreed plan.

EQUIPMENT SUPPLY

Our team of site specialists works closely with customers to understand their unique project challenges. With recent investment, we offer the most advanced non-mech equipment like ground mats and barriers. Combined with groundworks, surveying, traffic management, plant hire, waste management, lifting, power, lighting, and security, it's clear why Speedy Hire leads in temporary site services.

DELIVERY

With strategically located sites around the UK, dedicated to the supply of equipment to your site, we have the stock holding and availability to offer one of the fastest and most efficient delivery services on the market.

PROVIDE TRAINING FOR YOUR TEAMS

When training may be required for certain elements of a site set up, rest assured, our teams' specialist skills and experience, innovative technology and commitment to training and product development ideally position us to meet the challenge.

THE ULTIMATE END TO END SERVICE

Our site services offering doesn't stop at the planning and delivery stage. We have offer total project management throughout the life of the site. Delivering installation, on-going maintenance (including any fuel requirements) and complete de-rigging & removal through our expert teams. We also ensure all compliance checks are carried out any and emergency requirements are in place. We offer the ultimate comprehensive service.
