CUSTOMER SOLUTIONS

Since 2008 Speedy Hire has been creating seamless, bespoke customer solutions across a full range of market sectors, utilising our established long-term partnerships with world-class brands to complement our core hire range.

Our job is to provide your perfect solution. We do this by understanding our customers and the markets in which they work. We work as an extension to your own team meaning the cost and administration associated with hire is reduced, as Speedy Hire will liaise with your teams and effectively coordinate all their project requirements on your behalf.

Working with trusted partners, all recognised leaders in their own fields, we offer our customers peace of mind that they can source anything they need to deliver a successful project from day one. We can guarantee that we provide the very best quality of service aligned to our values, and those of our customers.

From a full site set up, including excavators, dumpers and telehandlers through to waste management, cranes and forklift trucks; Speedy Hire Customer Solutions works closely with each of its customers to understand the unique challenges of each job.

- **Access to a sustainable modern fleet from market leading brands**
- **One call solution**
- **Full supply chain process**
- **Specialist product knowledge and technical support**
- **Unlimited fleet of availability**
- **Consolidated invoicing**
- **Control of spend**
- **Reduced administration**

THE BRANDS WE WORK WITH:

SITE MOBILISATION

When you need welfare for your teams, we can arrange all your accommodation, storage, power, fuel, security and recycling requirements plus much more. Bringing everything together, quickly and efficiently.

An initial survey by our site services team will help you determine your exact requirements, including the scope of essential set up items such as WiFi and CCTV to ensure connectivity and security, even in the most remote areas.

Ongoing site management services such as facilities management, fuel deliveries, and waste management will help your compound run smoothly and efficiently, however long the job.

Call Speedy Site Services Team on 0345 850 9460 or email us at siteservices@speedyhire.com

COMPOUND SET UP

- Security
- Welfare and accommodation
- Fencing and pedestrian barriers
- ECO lighting
- Hybrid power generation
- Storage containers
- WiFi and communications
- HVO fuel
- PPE and consumables
- Forklifts
- Telehandlers
- Hazard control solutions
- Site traffic management
- Edge and ground protection
- Sleeper accommodation

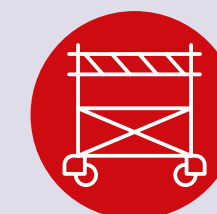

SITE MAINTENANCE

- Plant
- Transport
- Sweepers
- Waste management

ENABLING WORKS

- Arboriculture
- Landscaping tools
- Ground protection and temporary roadways
- Pumps
- Plant
- Compaction equipment
- Surveying and levelling equipment
- Confined space and escape breathing apparatus

SPECIALIST SERVICES

- Drone surveys
- Ground beating surveys
- Underground utility surveys
- Drainage surveys
- Ground investigation surveys
- GPR and utilities
- Scaffolding
- Underground utility surveys

TESTIMONIALS AND CASE STUDIES

GOOD HOPE HOSPITAL

"Thank you for another site mobilised and ready for our team to hit the ground running at Good Hope Hospital."

Every site set up we task Speedy with comes with its challenges, yet by working together the challenges are overcome and a solution is found. Thank you to Speedy for your continued support."

Ashley Houghton,
Technical Category Manager at Veolia.

SPEEDY BABCOCK EVENT

01

ACCOMMODATION

Our accommodation is the highest quality on the market. We go the extra mile to ensure that our fleet utilises the most up-to-date technology.

Speedy Hire can supply any kind of structure and has access to the largest fleet of containers in the UK. From a single steel framed temporary module to a bespoke multi-storey building for any purpose, whether it be temporary or permanent, we can supply mobile accommodation, extra office space, additional classrooms, temporary wards and theatres, temporary toilets and canteens plus much more.

SUSTAINABILITY

In addition, our eco range offers the most sustainable welfare products available in the industry today. The range is powered almost entirely by solar energy and has been designed to be net zero and carbon neutral in operation. The range incorporates innovative patented technology such as rain harvesting and water recycling plus many other features designed to lower environmental impact and make it easy for users to monitor and report on their carbon savings.

THE RANGE

- Stores and containers
- Portable toilets
- Welfare
- Offices and modular; including canteens, showers and changing rooms
- Effluent empties and water fills
- Sleeper accommodation

FEATURED PRODUCT

MAR-KEY STRUCTURE SOLUTIONS

When it comes to temporary warehouse and storage space, our solutions offer a faster and more cost effective solution to a standard extension.

There's no need to spend money moving goods off site when we can build additional facilities in your existing grounds.

From basic PVC wet weather covers and loading canopies to fully insulated buildings or a temperature controlled environment for your goods, we've got you covered.

We'll work with you to finalise interior layout options and entry/exit points so that your space works just as you need it to. Whether your business is in logistics, wholesale, manufacturing or freight, we will make your warehouse and storage space exactly as you need it.

Structures also available for retail, sports facilities and many more applications.

THE LATEST ECO SOLUTIONS

SOLAR LOO

The Solar Loo is the eco-friendly option to on-site toilet facilities. These self-contained units use their roof mounted solar PV panels to convert sunlight into electricity and are up to 96% CO₂ efficient. Reduce your sites carbon emissions whilst providing high quality sanitary facilities.

ECOSMART SOLAR MAX

Ultra-modern and designed with sustainability at its core for maximum energy and cost savings.

Extra large roof mounted solar panels and a lithium battery bank ensure maximum energy harvesting and storage, whatever the weather. Enjoy first class welfare facilities, sustainably powered, with a stage 5 back up HVO generator in place for ultimate peace of mind.

ECOMAX SOLAR

EcoMax Solar is the first and only double-stacked instant start welfare setup of its kind. It is powered by proven EcoLogic Solar hybrid technology, incorporating a large solar array on the roof. The framed staircase (another Advanté patented invention) means it is safe and quick to set up. Once in place, your EcoMax Solar welfare units can be easily relocated, giving total flexibility and reduced project costs.

ULTIMATE ECO 20FT MOBILE WELFARE UNIT

Solar powered with remote monitoring, the Ultimate ECO can boast near zero emissions with coupled with the use of HVO fuel. The unit will reduce water waste due a combination of grey water recycling, microflush toilets and waterless urinals.

- Can be towed site to site reducing transportation costs
- Network Rail approved

ECO CHARGE

The ultimate on-site stand-alone tool charging station. Our eco charge couples smart design with outstanding eco performance.

- Charge tools and other equipment easily and conveniently
- Lockers accessed from inside cabin for added security and protection from the weather
- Powered by free renewable solar energy with HVO biofuel generator back up if required

MOST POPULAR

STORAGE SOLUTIONS

Whether you require mobile secure storage for a temporary job, or for something more long-term, we have a range of secure storage products including Coshh, 16' Towable, 10' Containers and 20' Containers all of which are made from high security steel with safety padlocks.

PORTABLE TOILETS

Top quality portable toilet units delivered to your site the next day, ready for immediate use. We have access to over 10,000 units that are kept in excellent condition with a weekly service provided at no extra cost.

MOBILE WELFARE UNITS

Our modern and comfortable mobile welfare units offer flexibility and versatility with their unique hydraulic axles, meaning they can be set up and secured on site in 30 seconds. They include a table and seating area, full kitchen utilities, unisex toilet, as well as a separate drying room – 20ft units include office and desk.

WELFARE VANS

Our popular welfare vans offer a truly mobile welfare solution. Inside the welfare van, you'll benefit from a minimum of 7 crash tested M1 seats, full canteen facilities including microwave oven, hot water on tap, full sized sink, toilet and drying room – all contained within the van itself. Solar models also available.

SLEEPER ACCOMMODATION

Sleeper units provides a home-away-from-home accommodation experience that would rival many hotels. Within a compact portable unit that can be easily transported and set up on any temporary site, you'll find two bedrooms with Smart TVs, a fully-equipped kitchen and a slick modern shower room. Whether for construction/utility workers, an event or maybe due to an emergency situation, these stylish and comfortable units offer a great space to sleep and relax after a busy day.

MOST POPULAR

STORAGE CONTAINERS

A secure storage solution for your storage requirements, available in sizes from 10ft to 40ft.

- Full steel, anti-vandal construction
- Weatherproof
- Easy-opening cargo door
- Hardwood flooring
- A unique Tri-Cam locking system and Container Guard is fitted to most of our containers

20FT X 8FT OFFICES

An ideal choice for industries that require additional space for their workforce.

- Available in anti-vandal and energy saving range
- Open plan or various other configurations to meet your needs
- Full steel, anti-vandal construction, ensuring safety and security
- Heavy duty vinyl floor covering
- Lighting and electrics provided
- Insulated steel door with 11 point locking system

20FT X 8FT CANTEENS

A secure canteen unit, with access to power and basic kitchen facilities.

- Available in anti-vandal and energy saving range
- Full steel, anti-vandal construction ensuring safety and security
- Heavy duty vinyl floor covering
- Lighting and electrics provided
- Insulated steel door with 11 point locking system
- Complete with sink, worktop and under sink water heater

20FT X 8FT CHANGING ROOM

- Available in anti-vandal and energy saving range
- Full steel, anti-vandal construction ensuring safety and security
- Heavy duty vinyl floor covering
- Lighting, electrics and heaters provided
- Insulated steel door with 11 point locking system
- Fixed benching columns with hat and coat hooks above
- Industry leading dehumidification system, proven to dry work wear overnight

02

SITE SECURITY

Monitored technology including wireless alarms, cameras, sensors, bluetooth, GPS enabled devices and tower technology.

Enabling remote, fully off-grid protection all controlled from a 24/7 monitoring station. No matter the size or complexity of site.

Services can be adapted as your project progresses, we have the experience to design solutions using a range of products and services, managing varying levels of risk throughout the life cycle of your property or site.

THE RANGE

- CCTV towers
- Wireless, battery powered CCTV
- Fire alert systems

MOST POPULAR

INVIEW CCTV TOWER

Ideal for construction sites, vacant property, depots, warehouses, agriculture, car parks, utility sites, events and more.

- Rapid set-up - indoor and outdoor
- Solar and battery or mains power
- 6m mast with PTZ camera
- 360° coverage - 100m detection range
- Night illumination + infrared
- 100dB siren, voice challenges
- High def. real-time recording
- NSI Gold Cat II monitoring
- Mobile network connectivity
- Optional PPE Monitoring/compliance

INVIEW DETECT

An autonomous intrusion detection system utilising battery and solar power, perfect for areas requiring immediate security cover.

- Full 360-degree coverage
- Photo on demand and by scenarios
- Digital algorithm for filtering false alarms
- Integration with additional sensors such as smoke/heat/water detection and environmental sensors
- Lightweight, rapidly deployable with simple setup
- Android and IOS APP management
- Recycled and sustainable material

INVIEW VERIFIED VIDEO ALARM

Suitable for a wide variety of open sites and vacant properties where there's no mains or generator power. The inView technology range can be fully supported by an NSI Gold Cat II Alarm Monitoring Centre (ARC).

- Rapid deployment - indoor and outdoor
- Battery powered
- Secure wireless technology
- 108db siren
- Multiple sensors
- High resolution images
- Arm and disarm via secure mobile app
- 35m detection

MANNED GUARDING AND PATROLS

Highly responsive short or long-term contractual security guard service across the UK.

- Highly trained and Security Industry Authority (SIA) approved
- Rapid response security
- 24/7/365 cover
- Static manned guarding
- Stewarding and crowd control
- Guarding patrols and dog/K9 patrols
- Mobile security
- Keyholding services and more.

03

PLANT

Combining top quality equipment with an extensive range, we have the right machine for all applications on both operated and self-drive plant equipment.

THE RANGE

Excavators

From 0.9 tonne micro machines to heavy duty 47 tonne excavators, from compact minis that can operate in the smallest of spaces to 15m long-reach machines offering incredible versatility.

Dumpers

From 1 tonne skip loaders to 10 tonne dumpers, we have a choice of four dumper sizes for hire, and configurations to suit any site.

Telehandlers

Lifting from 4m to 20m, with a full incremental range in between, our telehandlers can cover the work of both forklift and crane in one versatile machine, while our roto machines offer even greater reach, up to 32m, with 360° coverage.

Roto telehandlers

A continuous 360° reach capabilities combined with impressive load heights. A true materials handling specialist, our rotating telehandler range offers precision control and efficient load distribution and unloading thanks to adjustable outriggers.

Compaction/rollers

Our roller range makes smooth work of levelling and compacting, with a choice of machines from 800mm twin-drum units, right up to massive 20 tonne 2130mm self propelled rollers that can tackle almost any surface.

Backhoe loaders

The JCB 3CX is the world's number one backhoe loader. In typical roading, loading, excavating and idle cycles, the 3CX JCB backhoe loader, equipped with a powerful Ecomax engine, delivers an average fuel saving of up to 16%, plus lower emissions and noise levels.

SUSTAINABILITY

Fitted with the latest safety features, emission standards and technology, we have access to one of the youngest plant fleet in the UK. Our machines offer power, performance and up to 34% fuel efficiency compared to older models. Our entire fleet now comes with the latest 4i/4i final engines offering more efficient performance and reliability.

EXCAVATORS

The excavator is a construction vehicle used to dig or move large objects. It is made up of two parts: a driving base and a powerful boom arm with an attachment designed for digging. It provides a comfortable and safe working environment with its spacious cab and enhanced visibility, suitable for working on projects such as earthmoving, utilities and general construction.

THE RANGE

Our excavator range is suitable for use on a wide range of projects. These combine the necessary power for demanding jobs with the versatility to work in any condition. They are compatible with a variety of attachments to complement individual business requirements.

EXCAVATOR 5T

EXCAVATOR 3T

EXCAVATOR 8T

DUMPERS

From 1 tonne skip loaders to 10 tonne dumpers, we have a choice of four dumper sizes for hire, and configurations to suit any site. Choose swivel or straight bucket to create the most effective and efficient unit.

1T HI-TIP

This 1 tonne hi-tip features a minimum width of under 1m matched to a high-lift function for tipping into builders' skips. It is hydrostatic with variable displacement pump feeding four wheel motors, incorporating "twin-lock" system to maximise traction.

6T SWIVEL

6 tonne power swivel earthmover with Deutz TCD 3.6 L4 61.5kW/74hp at 2200rpm, water cooled, four cylinders, charged air cooled turbo, electronic controlled fuel injected diesel engine. Powercore air intake filter and stainless steel exhaust system, including after treatment diesel oxidation catalyst providing conformity to EU Stage IIIB.

12T HYDREMA 912

The success of the Hydrema 912 dump truck is found in the articulated and oscillating pivot point. The centre pivot with hydraulic stabilisers keeps the machine stable and safe by automatically transferring the weight to where it is needed for added stability.

TELEHANDLERS

The telehandler is designed for material handling and movement of loads. They can be used in places like building sites, farms, warehousing and distribution areas. Its tight turning circle and great manoeuvrability enables it to work within confined areas.

THE RANGE

Our telehandler range is an excellent choice for high output sites that require resiliency and efficiency. These multi-purpose machines are capable of performing a wide range of essential daily work site tasks, including material handling and movement. They are compatible with a variety of attachments to complement individual business requirements.

**ELECTRIC TELEHANDLER
F626**

TELEHANDLER 6M

TELEHANDLER 7M

TELEHANDLER 9.5M

TELEHANDLER 14M

TELEHANDLER 17M

ROTO TELEHANDLERS

Lifting from 4m to 20m, with a full incremental range in between, our telehandlers can cover the work of both forklift and crane in one versatile machine, while our roto machines offer even greater reach, up to 32m, with 360° coverage.

4M JCB 520-40

The latest technology and advanced design provides low fuel consumption, reduced noise, high torque and power output, total reliability and minimal maintenance. Two-stage, dry type air filter with primary and safety elements.

14M JCB 535-125

The JCB 535-125 Hi-Viz is a full-sized three-stage loadall with a huge reach. With its lowered boom pivot and reduced-size (though very strong) boom section, the 535-125 Hi-Viz represents a major step forward in telescopic handler visibility.

20M JCB 540-200

With a 4 tonne maximum lifting capacity, and 20m lift height this is the largest telehandler in our range and is more than a match for cranes and rotos resulting in potential savings of both time and money hiring additional machines.

04

POWERED ACCESS

Our powered access solutions cover working heights from 4m through to 90 across our range of low-level access, scissors, boom tracked access and specialist vehicles.

THE RANGE

Scissors

Providing access up to 33m, our wide range of scissor lifts offer versatile access both indoors and outdoors, with electric, bi-fuel, and diesel options available.

Booms

With a wide range of boom lifts for hire offering working height access from 10m to 56m we're sure to have the perfect cherry picker for your needs.

Spider lift

Spider lifts (aka tracked boom lifts or tracked cherry pickers) are fitted with an articulated or telescopic boom lift mounted on tracks to reduce ground pressure and fitted with outriggers to add stability – making them perfect for difficult access and egress challenges.

Truck mounted

Our truck mounted cherry pickers offer flexible access from 14m to 90m, with both self-drive and operated hire options available.

Van mounted

Our range of van mounted platforms start with working heights of 13m up to 17m offering ideal access when working on public highways.

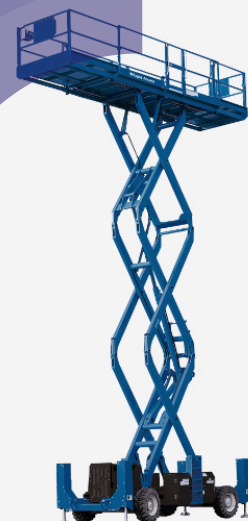

MOST POPULAR

Z45DJXC - 16M DIESEL BOOM LIFT

The Genie Z45DJXC boom lift is the redesigned 'extra capacity' version of the brand's best-selling rough terrain Genie Z45 diesel powered articulating boom. Combining up to 100 percent more lift capacity and weighing just 440kg more than the standard model, with new design features including a new 1.83m dual entry platform and reinforced components to support additional weight in the platform.

GS43 - 15.1M DIESEL SCISSOR LIFT

The Genie scissor lift GS43 is a popular unit with 15.1m working height and safe working load of 680kg. This machine features four wheel rough terrain drive and an extended deck to lift seven operators to height. For added peace of mind, this product can be fitted with our SkyRakPlus®.

(26EMB) HAULOTTE STAR10 10M (32FT) W/H ELECTRIC MAST BOOM

The Haulotte Star10 lifting mast is designed to elevate workers and their tools to working heights. Featuring zero tail swing and a tight turning radius, the 3m outreach still ensures good accessibility even in tight spaces.

T22GS - 22M TRUCK MOUNT

The King T22GS is a popular unit which offers its users a access to working heights of 22m, suitable for short term hire and quick removal from site. The truck mounted lift accommodates up to two operators.

SKYJACK SJ3219 7.80M (25FT) W/H ELECTRIC SCISSOR

The electrically powered platform scissor lift is designed to elevate workers and their tools to working heights. Capable of manoeuvring in confined indoor and outdoor sites and is suitable for a wide range of construction, maintenance, and industrial applications offering a quiet, compact and versatile machine with zero emissions.

05

CRANES AND VACUUM LIFTERS

Speedy Hire offers a range of specialist lifting products for use in confined and restricted access areas.

Providing a range of UNIC mini spider cranes, pick and carry cranes, glazing robots, vacuum lifters, overhang beams and other specialist lifting equipment, for use on both simple and complex lifting projects.

Full contract lift packages are available from GGR Group and include site surveys, lift plans and risk assessments produced by CPCS accredited appointed persons.

A dedicated contract lift team is also provided that includes a CPCS A66 qualified crane operator, CPCS accredited crane supervisor and CPCS slinger/signaller.

THE RANGE

- UNIC mini spider cranes
- Pick and carry cranes
- Vacuum lifters
- Overhang beams
- Glazing robots

TOP 5 ECO INNOVATIONS

ELECTRIC TELEHANDLER F626

Offering the same performance as an equivalent conventional telehandler model but without the noise of a combustion engine, the electric telehandler 2.6 tonnes operates with zero CO₂ emissions and is a pioneer within the materials handling equipment industry.

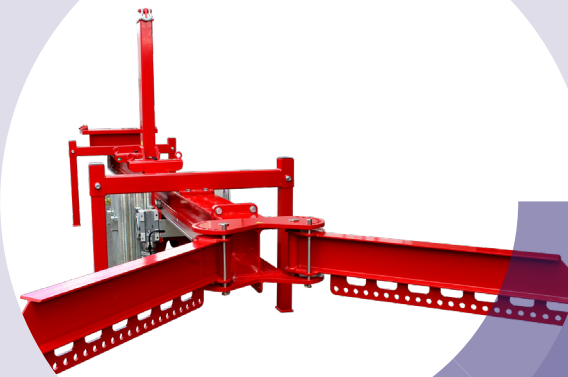

- Capacity: 2600kg
- Max. lifting height: 5.9m
- Working radius: 3.1m

GF250 PICK AND CARRY CRANE MCGF250

The battery powered GF250 is capable of lifting 25 tonnes to a height of 1.5m and is the perfect choice for heavy duty lifting in workshops, yards, marinas, aircraft hangers, factories, construction sites and more.

- Capacity: 25.0t x 1.5m
- Boom length: 4.9 - 11m
- Working radius: 7.5m

LIBRO 3000 OVERHANG BEAM - CORNER UNIT VOB3000

The Libro 3000 is fully battery powered by a 24v rechargeable battery which powers the counterweight rack and pinion saddle. It offers users the ability to fit under overhangs up to 4.1m deep to assist with the most trickiest of glazing projects.

- Capacity: 3000kg
- Depth of overhang: 4.1m (with hook), 5.3m (with corner lifter)

TRACKED LEVELLER WITH CRANE ATTACHMENT TPS 5.5 CRANE

The Tracked Leveller with crane is one of the first tracked levellers to feature a crane attachment to lift and place loads onto the bed of the machine for transportation.

- Bed capacity: 5500kg
- Crane capacity: 990kg
- Max. crane lifting height: 6.9m

ECO 295-3 UNIC MINI SPIDER CRANE MCU295-3B

The battery powered UNIC URW-295-3 retains all the benefits of the standard URW-295 model, but sees the addition of variable, adjustable outriggers, enabling this mini crane to operate around fixed obstacles on site to suit the lifting requirements.

- Capacity: 2.9t x 1.4m
- Max. lifting height: 8.9m

MOST POPULAR

UNIC URW-1006 MINI SPIDER CRANE MCU1006

The UNIC URW-1006 offers a generous 30.7m lifting height and 24.3m working radius, yet at only 2m wide still retains class-beating minimal dimensions for working in restricted spaces.

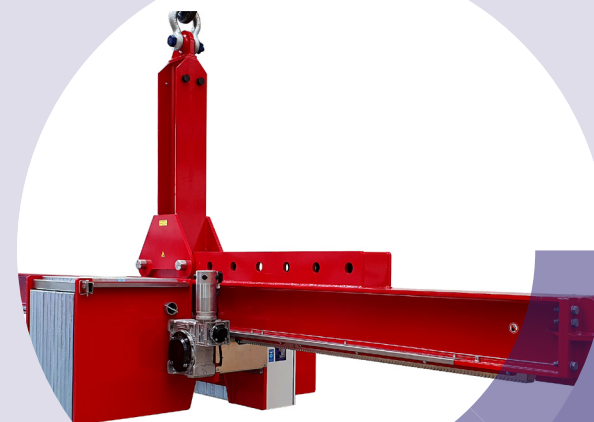

- Capacity: 10t x 3m
- Max. lifting height: 22.8m
- Total width: 2m

GLASS VACUUM LIFTER VGL11 IG

This best-selling glass vacuum lifter is a convenient tool for lifting glass, metal, ceramics and other non-porous materials. The P11104 enables users to quickly manoeuvre loads into position with its 180° rotation and 90° tilt.

- Capacity: 320kg
- Rotation: manual 180° lockable
- Battery: 12v

LIBRO 20000 OVERHANG BEAM VOB20000

For the largest and heaviest jobs, the Libro 20000 is the ultimate in overhang beams, with a mammoth 20 tonnes capacity this unrivalled machine is designed for use with tower cranes and mobile cranes to aid in the installation of glass, cladding, stone, and curtain walling up to an overhang of 3m deep.

- Capacity: 20000kg
- Depth of overhang: 3m

G20 PICK AND CARRY CRANE MCG20

The slimline G20 pick and carry crane offers two tonnes of lifting power without the need for outriggers. A practical alternative to a forklift, this pedestrian operated compact crane comes with a 5.3m maximum lifting height and can quickly pick, carry and place loads thanks to its 180° rear hydraulic drive.

- Capacity: 2.0t x 0.5m
- Boom length: 2.15 - 5.15m
- Working radius: 3.5m

OSCAR 1400 GLAZING ROBOT GRG34

The dual circuit Oscar 1400 is the highest capacity glazing robot in the range, it's the perfect solution for lifting and transporting a range of heavy glass, ceramic plates, plastic boards and any other non-porous materials.

- Capacity: 1400kg
- Working height: 4.9m
- Width: 1300mm

06

FLOORING SOLUTIONS

Advanced machinery and tooling solutions for construction and flooring projects, including walk-behind concrete grinders, remote grinders, ride-on floor scrapers, shot blasters, diamond tooling, polishing equipment, and dust vacuums and collection systems.

Our equipment is designed to provide efficient and comprehensive solutions for all your site needs, ensuring high performance and reliability tailored to meet the demands of various projects.

THE RANGE

- Walk-Behind Concrete Grinders
- Remote Grinders
- Ride-On Floor Scrapers
- Shot Blasters
- Wide Range of Diamond Tooling
- Polishing Equipment
- Dust Vacuums and Collection Systems

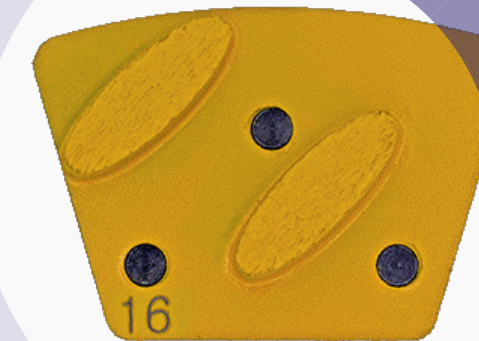

APPLICATIONS

- Construction Sites
- Industrial Facilities
- Commercial Properties
- Renovation Projects
- Infrastructure Development

MOST POPULAR

WALK-BEHIND CONCRETE GRINDERS

Ideal for smoothing and levelling concrete surfaces, ensuring precision and ease of use.

- Robust build for heavy-duty tasks
- Adjustable speed for various applications
- Efficient dust management system
- Ergonomic handle design
- Easy to transport and operate

REMOTE GRINDERS

For areas requiring meticulous grinding without manual intervention, providing consistent and high-quality results.

- Remote operation for increased safety
- High-performance grinding capabilities
- Suitable for large surface areas
- Integrated dust collection system
- Durable and reliable

RIDE-ON FLOOR SCRAPERS

Efficiently removes floor coverings such as tiles, carpet, and more, with minimal effort and maximum productivity.

- High-power engine for tough jobs
- Comfortable ride-on design
- Adjustable blade angles
- Quick and easy blade changes
- Superior manoeuvrability

DUST VACUUMS AND COLLECTION SYSTEMS

Essential for maintaining a clean and safe work environment, ensuring efficient dust extraction and collection.

- High suction power
- Suitable for various types of dust and debris
- Portable and easy to manoeuvre
- Durable construction for long-term use
- Compatible with other equipment for integrated dust management

DIAMOND TOOLING AND POLISHING EQUIPMENT

Offering a wide range of tools and equipment for grinding, polishing, and finishing concrete surfaces to perfection.

- Variety of diamond tools for different applications
- High-quality polishing machines
- Achieves smooth, polished finishes
- Durable and high-performance
- User-friendly and versatile

SHOT BLASTERS

Perfect for surface preparation, removing contaminants, and profiling surfaces to create a better bonding area for coatings.

- High blasting efficiency
- Adjustable settings for different materials
- Portable and easy to use
- Effective dust control system
- Long-lasting components

07

CLEANING AND SWEEPERS

Speedy Hire can provide cleaning products and services for leisure, households, trade and industry nationwide.

Our customers benefit enormously from using effective, efficient and environmentally friendly cleaning products. These make a noticeable difference in the lives of our customers by providing effective, efficient solutions for everyday cleaning and watering tasks all over the world.

THE RANGE

- Scrubber dryers
- Sweeper and vacuum sweepers
- Steam cleaners
- Pressure washers
- Trailer pressure washers
- Carpet extractors
- Industrial vacuum cleaners
- Escalator cleaners
- Pedestrian sweepers
- Road sweepers
- Operated road sweepers

MOST POPULAR

SCRUBBER DRYER

BR 35/12 C

Agile, lightweight and quiet this scrubber dryer revolutionises high footfall floor cleaning with its fast rechargeable, rotating brush head, roller brush technology and eco efficiency mode.

SCRUBBER DRYER

B 80

Professional heavy-duty scrubber dryer makes light work of dirty floors. Packed with features to make it easy and safe to use and maintain, and offers exceptional cleaning results. Available in Disc and Roller Brushes.

SCRUBBER DRYER

B 250 R

Compact, battery-powered B 250 R ride-on scrubber dryer, available on both roller and disc brush heads at various working widths. For maintenance cleaning and polishing areas up to 12,000mA it features a large 250L water tank. The compact design enables a high level of manoeuvrability and optimised area coverage.

COMBINATION SCRUBBER DRYER SWEEPER

B 300 RI INDUSTRY

The combination machine B 300 RI is a powerful combination of a scrubber sweeper and sweeper with a working width of up to 1755mm.

**[CLICK HERE TO WATCH
OUR VIDEO](#)**

SWEEPER

KM 130 INDUSTRY

Fully hydraulic industrial sweeper with robust design for the toughest jobs, e.g. in the building material and metal industry, in foundries or other facilities with large amounts of dirt.

MOST POPULAR

MUNICIPAL SWEEPER

MC 250 CITY

The best of everything, our environmentally friendly vacuum sweeper MC 250 impresses with a superior sweeping performance and maximum operating and driving comfort in all urban areas.

PRESSURE WASHER

HDS 801 D

The HDS 801 D is a mobile hot water pressure washer built on a corrosion resistant tubular steel frame offering all-round protection for components. Ideal for cleaning applications where there is no power supply available.

PRESSURE WASHER

HDS 17/20 DE TRI

Self-sufficient and mobile the HDS 17/20 hot water high-pressure cleaner works without power source at pressures of 200 bar. The highly-efficient HDS Trailer is suitable for the municipal sector, industry and construction.

STEAM CLEANER

SGV 8/5 HOSPITALITY

Innovative steam-generating vacuum for easy deep cleaning of hygiene-critical environments. With 8 bar steam and self-clean function.

ESCALATOR CLEANER

BR 47/35 ESC TRAIN STATION

The BR 47/35 Esc makes it possible to wet-clean an escalator while it is moving. Deep cleaning and maintenance cleaning operations can be performed six to seven times faster than with other systems available in the marketplace.

HVAC

Speedy Hire provide a wide range of heating, cooling and drying systems. Our modern range of specialist products include heating and hot water boilers, steam boilers, chillers and heat pump chillers, indirect fired heaters, desiccant dehumidifiers and air handling equipment. Widely used across multiple sectors, we can provide a suitable temperature control, drying and hot water solutions to your site.

Our indirect fired heaters (IDF) range from 35kW through to 500kW. Our chillers range from 15kW through to 750kW, our boilers Range from 22kW through to 3000kW (3MW)

For both planned maintenance and emergency requirements, we offer a comprehensive total service including site surveys, advice on product selection, technical advice and full installation and commissioning with full 24/7/365 support.

Our industry leading GSM telemetry systems can monitor fuel usage, provide fault diagnosis, and moisture monitoring through SIM and cloud based telemetry systems.

SUSTAINABILITY

As part of our commitment to provide customers with solutions that use the right refrigerant for each application, we have selected R-32 refrigerant to replace R-410A refrigerant, a high global warming potential (GWP) refrigerant, in commercial chillers using scroll technology. The R-32 was chosen for its lower environmental impact, high energy efficiency, wide availability and ease of use. All of our boilers and indirect fired heaters can operate on HVO Fuel.

COOLING HIRE SOLUTIONS:

- Chillers
- Cooling towers
- Air handling units
- Fan coils
- Dry air coolers
- Portable air conditioning
- Cold/chill stores

HEATING HIRE SOLUTIONS:

- Boilers – LTHW and MTHW
- Portable heating
- Heat pumps
- Direct gas fired heaters
- Indirect fired heaters

DEHUMIDIFICATION HIRE SOLUTIONS:

- Refrigerant
- Desiccant
- Remote humidity monitoring
- Cooling coils

STEAM HIRE SOLUTIONS:

- Electric steam boilers
- Containerised steam boilers
- Trailerised steam boilers
- Static steam boilers

MOST POPULAR

CRS MBR 1200 DF

Used by M&E, HVAC contractors and end clients alike, the CRS 1200 boiler provides total cover for both planned and unplanned heating requirements.

- Simple electrical connections
- Energy efficient
- Easy installation, plug and play
- Easy to use control system
- Dual fuel

CRS MBR 22 ELECTRIC

The 22kW mobile boiler hire unit is capable of providing temporary heating and hot water and is easily connected to existing pipe work using flexible hoses. The unit is supplied with an integrated heat exchanger and booster pump.

This unit is supplied with an integrated heat exchanger and booster pump.

- Small footprint
- Easy Installation, plug and play

CRS MH500 IDF HEATER

Due to thermostat controls, the unit can be left to run unattended for long periods of time. The CRS 500kW indirect diesel fired heater is the largest indirect oil fired heater available to hire on the market today.

- Fume free heating
- Fuel efficient

CRS KWIKDRY 8000

The KwikDRY 8000 desiccant dehumidifier is designed to efficiently dehumidify in low moisture applications.

- Site moisture conditions monitored
- Large airflow of 8,000m³/hr

CRS 402 CHILLER

The CRS 402 chiller is a state of the art, energy efficient chiller. The CRS 402 chiller has a very compact footprint and has been developed with integral pumps.

- Environmentally friendly
- Energy efficient
- Easy Installation, plug and play
- Low noise compressors
- Innovative and reliable refrigerant system

MOST POPULAR

80KW ELECTRIC BOILER

An economical, eco-friendly heating solution with lower running costs than oil alternatives. It features a circulating pump for flexible installation, emits no CO₂, and offers quiet operation with a controllable thermostat.

- Environmentally friendly
- For heating and hot water
- Quick connections for emergency heat
- Connect alongside other boilers for larger requirements

SUPER WISPASET 80 ECO

The Sykes Super Wispaset 80 eco is a 3" super-silenced diesel pump designed for quiet operation. It features a 35-litre fuel tank for 24-hour use, delivers heads up to 24m, and includes automatic priming with the Sykes Univac system.

- High performing 3" super silent diesel pump
- Small footprint
- Stage V compliant

SUPER WISPASET 150 ECO

The Super Wispaset 150 eco is a 6" super-silenced, Tier V-compliant pump with low emissions and fuel consumption. It features an acoustic canopy for quiet use, remote monitoring via telemetry, and bunding for spill protection.

- 6" performance with low fuel usage
- Tier V compliant engine
- Models available for auto start/stop and telemetry alerts

FAST CHILL 21 SERIES 2

The Fast Chill 21 Series 2 is a versatile cooling unit, reaching -10°C with a 6.4kW capacity. It uses low-GWP R454C refrigerant and features an automatic thermostat for precise control, ideal for cold storage.

- Plug and Play Installation
- Fast installation
- Low air temperature for fridge/freezer temperature ranges
- Easy controls

LC50 LAMELLA CLARIFIER

A large settling tank to remove suspended solids from liquids in water treatment. Its inclined lamella plates optimise surface area, making it suitable for utilities and wastewater plants.

- Can treat water with flow rates from 1 - 50m³/hr
- Lamella technology ensures maximum settlement area and effective separation of solids
- Utilise on its own or with other Silt Away equipment for a full water treatment system

ARENA 15 EVAPORATIVE COOLER

The Arena 15 evaporative cooler is perfect for large spaces where traditional air conditioners are impractical. It provides economical, eco-friendly cooling for warehouses, workshops, and factories without needing warm air extraction.

- Plug and play
- No refrigerant
- Multi speed fan
- Fully portable

09

NON-MECHANICAL

Speedy Hire provides a comprehensive range of modular and propriety temporary works equipment for ground support, formwork, falsework, refurbishment and various other systems.

THE RANGE

- Goods handling and forklift equipment
- Groundworks and general plant
- Roads and fencing

MOST POPULAR

SITE STAIRWAYS SYSTEM

Stairways offer safe work access for a number of problem situations including civil engineering projects, between floors on RC frame contracts or on motorway and railway embankments.

- May be used as individual stairs or joined together for longer reach
- A maximum number of 21 steps can be achieved by interlocking 18 steps to 3 steps
- Can be used anywhere where temporary access is needed from one level to another

UNIVERSAL GROUND PROTECTION MAT (UGPM)

The UGPM is a 'man-handle-able' mat that provides a safe and temporary access for both tyred or rubber tracked vehicles. Two person lift with hand cut outs for easy handling and installation.

- Disperses mud but still gives grip to rubber tyred vehicles or pedestrians as they cross
- The traction tread aids gripping to the surface
- Can be used across a wide range of industries

PLASTIC UNIVERSAL BARRIER SYSTEM

Available in 1m and 2m lengths and designed for situations where storage is at a premium. Can be used in either temporary or permanent situations.

- Units stack to minimise transport and storage costs.
- Made from UV stabilised LLDPE
- Top sections can also be added if required including pedestrian and vehicle gates.
- Water filled units

ROAD PLATE (ANTI-SKID)

Anti-skid paint system and fitted with a central lifting point for use with the steel plate lifter (SPL), we can offer a very hard wearing, safe to handle and manoeuvre, anti-skid road plate ideal for all highway, runway and pedestrian uses.

- Lifting points in each corner
- Central lifting point for easy lifting
- Four fixing points for the RP bolt/lock system to bolt through into both concrete and asphalt

EUCALYPTUS CRANE MATS

Eucalyptus crane mats are designed to provide ground protection and temporary roadway access for vehicles to areas with difficult ground conditions. They are also used to reduce axle weight pressures and reduce the risk of damage where access is required over underground services.

- Strong, light and sustainable
- Two lifting points present

10

PIPE WELDING TOOLS

Speedy Hire provides access to the UK's leading supplier of butt fusion and electrofusion pipe jointing equipment for hire, sale and repair.

Our specialist skills and experience, innovative technology and commitment to training and product development ideally position us to meet the challenges of dynamic industrial and utilities markets.

EXPERTISE

Our offering is underpinned by a continual commitment to building our business around our customers' needs, with the emphasis firmly on:

- Superior technical expertise
- Unrivalled range and availability
- Friendly and responsive service

REPAIR AND CALIBRATION

All repairs, refurbishments and calibrations are carried out to the highest standard by factory trained and authorised engineers, to industry and manufactures specification. Whatever the problem, our expert engineers are on hand.

THE RANGE

- Electrofusion
- Butt fusion

MOST POPULAR

EFUZE iACT

The iACT is the world's first battery powered electrofusion welder that can be used all day every day. This major advancement in welding technology offers a self-contained welding unit that needs no external power source to operate.

- Live welding voltage and current
- Live GPS position
- Calibration status

ATS 180 COMBI UNIT

- All in one generator and electrofusion welder
- Handy portable unit size – compact and convenient
- Specifically designed for service pipe installation and house connections market
- Full data logging capabilities
- Download data log using USB memory
- Power outlet capable of powering auxiliary equipment when electrofusion welder is not operating

ATS 180 MAX

The ATS180 Max welding unit has been designed to weld constant voltage electrofusion fittings suitable for low and medium pressure PE or PP pipe work systems from 16mm to 400mm diameter.

It has been designed especially for the house-connection market where a small, lightweight and portable unit is required for multiple small diameter connections.

- Operating modes: manual and barcode.
- Welding voltage: 8v to 48v

TRACSTAR T500 SERIES 2&3

- Heater and facer mounted on hydraulic indexer
- Fuel-saving auto-throttle
- Standard hydraulic clamping
- One heater covers entire range of pipefusion sizes
- Datalogger® compatible
- Available as manual and automatic
- Size range: 250 - 500mm

DYNAMIC 250 AND 315

- Fully automatic modular design
- Featuring a common electrical control unit
- Datalogger® compatible
- Rugged and compact
- Size range
- Dynamc 250: 90 - 250mm
- Dynamc 315: 125 - 315mm

UTILITIES

Lanes Group is the UK's largest drainage and wastewater service provider.

Lanes provides round the clock support to our extensive client base. With a network of strategically located depots, offering fast and effective drainage solutions, we stand proudly at the heart of the UK drainage industry and firmly on a commitment to excellence in everything we do.

SERVICE PROVISION

- CCTV Surveys and Investigations
- Blockage Removal
- High Pressure Water Jetting
- Excavations and Repairs
- Vacuumation and Overpumping
- Sewer Renovation and Rehabilitation - Full Length Lining and Patch Repairs
- Waste Management
- Grease Management
- Pollution Control
- Tank Emptying, Cleaning and Disposal
- Water Supply Services

These core services are supplemented by other specialist services, including: poly pigging, descaling, drain tracing, CAD design and GPS plotting. These services can be provided ad hoc or as part of a performance-measured service contract. Services can be delivered individually or bundled together, locally, regionally or nationally.

MOST POPULAR

VAN PACKS

Van Pack is fitted with a 40hp JCS9 unit which produces up to 3000 PSI / 207 BAR at 15 GPM / 70 LPM. As well as the capability to jet drains up to 9" / 225mm, each van has a Minicam CCTV Push Rod System.

JET VACS

This unit is used for a wide range of tasks including clogged service lines, emptying of septic tanks, transportation of liquids amongst others. Each jet vac unit produces 2200 PSI / 151 BAR at 86GPM / 391 LPM. Vacuum pump performance is 800cfm - 4000cfm depending on type.

RECYCLERS

Each recycling unit produces 2200 PSI / 151 BAR at 86GPM / 391 LPM. Vacuum pump performance is 1200cfm. This unit provides constant suction and are ideal for wet well cleaning.

CITYFLEX UNITS

The CityFlex unit is best suited for densely populated areas, where small-scale jetting and suction tasks need to be carried out without unnecessary obstruction of traffic, which could be caused by a larger unit.

TANKERS

A modern fleet of over 70 vacuum tankers which range from 360cfm to 1500cfm in terms of capability. These are fitted with mox pumps which are suitable for heavy sludge removal.

CCTV UNITS

There is currently over 125 CCTV units within its fleet including but not limited to: Ibak Panorama, CCTV Units, 4x4 Supervision CCTV Unit, Proteus Mainline CCTV Units, Ipek Rovver Mainline CCTV Units, Ipek Rovvion CCTV Units, Dual Liner CCTV Units, Portable Proteus Trolley CCTV Systems, Floatation Units and Polecam Units.

PUMPS

SOLIDS HANDLING PUMPS

The "S Range" goes from 4" to 12" with solids handling capabilities of up to 5" and total heads of 32m.

To complement the existing fleet of solids handling pumps, a range of BBA Stage V solids pumps have been introduced to the fleet.

- Super silent pumps available
- Auto start option on float switches
- Compatible with HVO fuel
- Stage V pumps available
- Remote telemetry monitoring available

DRAINER PUMPS

The "D Range" robust high performance pumps go from 3" to 8", particularly suitable for water companies, pump hirers and high flow applications producing an impressive maximum flow rate of 600m³/hr, a total head of 40.5m and solids handling up to 2".

To complement the existing fleet of drainer pumps, a range of BBA Stage V drainer pumps have been introduced to the fleet.

- Super silent pumps available
- Auto start option on float switches
- Compatible with HVO fuel

- Stage V pumps available
- Remote telemetry monitoring available

HIGH HEAD PUMPS

These specialist "H Range" pumps, available from 3" to 8", are ideal for high head de-watering, with up to 158m heads for quarrying and mining. Also used as pipeline pressure testing and cleaning, water boosting and temporary fire protection, these pumps achieve flows of up to 750m³/hr and are found in markets such as construction, oil and gas, marine and water and waste water.

The 'H' range also features abrasive resistant pump ends (HM) ideal for those more arduous applications.

HYDRAULIC SUBMERSIBLE PUMPS

The "HS Range" hydrosb pumps comprise four powerpacks capable of using 2" to 8" hydraulically driven pumps.

SUBMERSIBLE SEWAGE PUMPS

Our sewage submersible pumps range from 3" to 20", cover an extensive performance and are used for a variety of applications. These include pumping sewage in treatment plants and municipal applications to irrigation, industrial effluent, processing water and raw water handling.

An extensive range of hydraulic components (eg. impeller, volute) are available to handle the different types of applications.

HYBRID PUMPS

The Hybrid NZ pumps are mounted onto a skid chassis, fitted with key components from the unique priming vacuum system and are controlled by a variable speed drive. Explosion proof (EXD) pumps available.

SUBMERSIBLE DRAINER PUMPS

Submersible drainage pumps ranging from 2" to 10" are suitable for a very broad field of applications. They are used for de-watering on construction sites for houses, streets and roads, tunnels and rock caverns, harbours and dams, for drainage and ballast pumping in shipyards, for drainage in the event of flooding in mines and industrial plants, for cooling, clean water, raw water supply and water spraying.

The pumps are designed specifically for handling media containing highly abrasive materials such as clay, sand and drilling fines.

These pumps cannot be installed in EXD areas.

TOP 5 ECO INNOVATIONS

POTABLE WATER CONTAINER

This is effectively a plug and play solution – the temporary system is set up, secured and connected to the existing pipework.

- WRAS approved materials and equipment
- Built-in watermaster flow meter
- VSD variable speed
- Remote telemetry monitoring and control
- Electric pressure monitoring and control

S160ECO5

The S160Eco5 is one of the quietest and most reliable solids handling pumps on the market, suitable for use in low emission zones, this pump is ideal for most solid handling jobs.

- Stage V pump
- Reducing emissions without sacrificing performance
- Designed to handle large solids including raw sewage and fibrous solids without blocking
- Solids handling of 100mm
- HVO fuel compatible

SIPHONING SYSTEM

This system of pumping is an environmentally friendly way of pumping, requiring little maintenance once it is up and running.

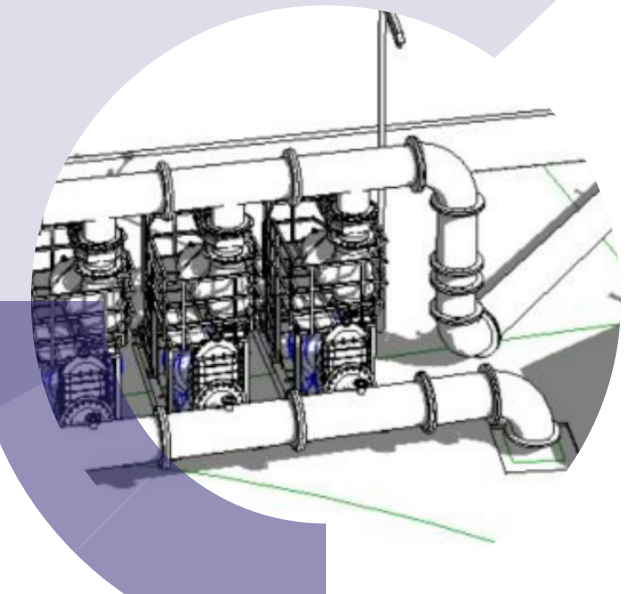

- Eco-friendly pumping solution
- Saves on fuel and upkeep costs
- Ideal for raw water
- Perfect for pumping downstream and bypass pumping
- Using this system saves huge amounts of CO₂ that would be generated using a usual pump set up

MCC CONTAINER

The self-contained electrical unit, incorporating multiple control panels in one system.

- All built-in, reducing human error
- Easy to use PLC screen
- Internal distribution unit
- Level control system provided
- Internal heating and lighting
- Lockable and secure

CAD

To ensure that we can produce the best solution for any project, large or small, we use CAD. This allows our team to visualise the installation and ensure that our suggested solution is the ideal solution for the job.

- Allows for the project to be reviewed clearly and concisely before installation
- Removes unnecessary trips to site for missing items as it produces a list of required materials and a loading plan

TOP 5 POPULAR PRODUCTS

BBA B100K

We can always provide the customer with the most efficient and cost-effective solution for the job, in line with our reputation for providing exceptional service and solutions.

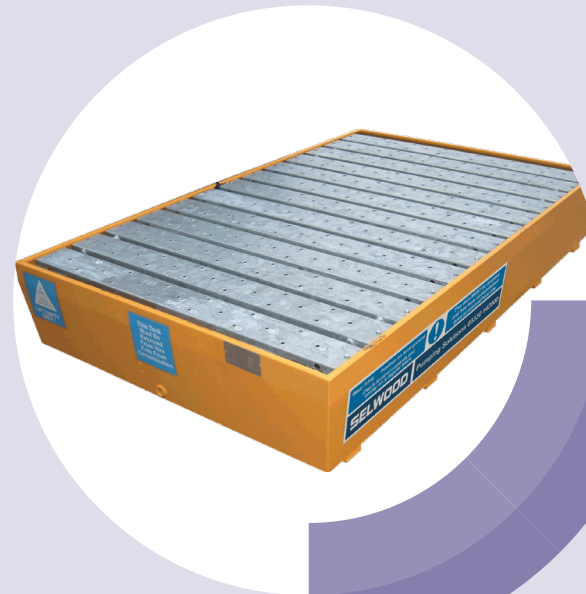

- Stage V pump
- Fully bunded
- Robust pump and canopy perfect for use on heavy duty sites
- Lockable doors
- Solids handling capacity of up to 82mm
- Low fuel consumption
- HVO fuel compatible

BÖRGER PUMPS

With a high capacity for solids, these electric driven, positive displacement pumps are perfect for use with; waste water, piling, oil containment and clear up, sludge, contaminated media and agriculture.

- Pressure sensors and dry running protection included
- Will pump liquid down to -20°

DRIP TRAY

Our interceptor drip tray is one of our most popular products for environmental protection, with added protection against the harmful risks and costs associated with fuel and oil leaks.

ELECTRIC END SUCTION PUMPS

Our wide range of electric driven pumping options are an important part of our overall pump offering and can significantly reduce on-site operating and maintenance costs.

- Uses existing site electricity
- For use in low emission zones
- Eliminates regular site refuelling
- Ideal for use where a diesel cannot be used
- Quiet running, making them perfect for populated areas or night time operations

NZ PUMPS

The hybrid concept is ideal when dealing with high flows from small chambers that preclude the use of conventional submersible pumps.

- Uses on-site power as electric driven motors
- Greater flow capabilities meaning less pumps needed
- Little to no emissions as electric powered
- Minimal noise
- Minimal footprint on site

WASTE MANAGEMENT

13

Speedy Hire can assist with all aspects of waste removal and disposal, up and down the country. From mixed general waste, to hazardous and specialist materials.

SKIP HIRE

We supply all types and sizes of skips and manage the collection and disposal of a wide variety of waste streams ranging from general waste and wood through to gypsum and asbestos. By working with a localised supplier base, we're able to offer competitive rates, rapid turnaround times for both quotes and deliveries and our service success rate for on-time collections is 99%. **GET AN INSTANT SKIP QUOTE** speedyservices.com/skip/skip-hire

GRAB AND TIPPER VEHICLES

Ideal for clearing away large volumes of waste, soil or excavation materials, our grab hire lorries are available in a range of sizes to suit all projects. The lorry's grab bucket can assist with accessing large quantities and can conveniently manoeuvre around awkward to reach spaces such as over walls or in smaller areas.

AGGREGATES SUPPLY

This is often a complementary service selected by customers booking collections using grab and tipper vehicles. We can deliver a range of quarried and recycled materials from products such as MOT type 1, 6F2 and pipe bedding to top soil, sharp sand and crushed bricks.

ROAD SWEEPERS

We offer national coverage with a full range of operated road sweepers, high pressure road jetters and gully trucks, all available on a short or long term basis. This is an essential service for developers to maintain site cleanliness and satisfy their commitments to the local authorities and residents they engage with.

MAN IN VAN AND CAGE LORRIES

We offer site clearances ranging from a man in van collection to caged vans, ranging from 3.5 tonnes to 7.5 tonnes. Both will save you time and permit charges, caged lorries are also ideal for narrow streets and small spaces where a skip hire may not be attainable.

HAZARDOUS WASTE

Our hazardous waste collections are quick, easy and safe. We cater our services to your exact needs, including quantities of the waste and how many collections you need. Whether you need to get rid of aerosols, mixed waste electrical equipment, oily rags, paint tins, our on hand team will be able to facilitate your needs.

WASTE MANAGEMENT ONLINE PORTAL AVAILABLE, PROVIDING LIVE AND INSTANT ACCESS TO:

- Online booking
- Instant quotes
- Up-to-date ETAs
- Waste reports
- Legislation download

14

MATERIAL HANDLING

For every materials handling application reliable high-performance equipment is key. And Speedy has a product for every application.

We pride ourselves on delivering the best range of forklift trucks and service in the industry. Our wide-ranging availability of fully certified LOLER counter-balance forklift trucks provides a solution for your material handling requirements both indoors and outdoors.

ECO RANGE

We're committed to ensuring that our customers have access to the products and technology that will help them operate in a sustainable fashion, meaning that an increased proportion of our product range is benefiting from electrification and battery powered technology. As an example, the Big Trucks product group now includes a number of electric options, which is significant given the traditionally high levels of fuel consumption and emissions from this type of machine.

Whilst the overall objective must be focused on moving towards greener and more sustainable solutions, there should also be consideration for how we can develop existing technology to become more environmentally friendly. Through Hyster's Stage V compliant diesel engines, we've been able to take a huge step forward, allowing customers with even the most demanding applications to still achieve certain green objectives and reduce their carbon footprint.

THE RANGE

- 1 - 3.5 tonne gas/diesel counterbalance forklifts
- 1 - 3.5 tonne electric (4 wheel cushion tyre) forklifts
- Reach truck
- Power pallet trucks

MOST POPULAR

1 - 3.5 TONNE GAS/ DIESEL COUNTERBALANCE FORKLIFTS

H1.6 - 2.0FT – 1600 - 2000kg

- Auto deceleration system (ADS)

MR10 - 14E – 1000 - 1400kg

- Tilting mast with integrated side shift
- Excellent visibility

MR14 - 25 – 1400 - 2500kg

- Heavy duty, high-capacity mast
- Energy efficient

POWER PALLET TRUCKS

**MP16 - 22 – 1600 - 2200kg
(Pedestrian low lift pallet truck)**

- Ergonomic tiller
- MOSFET control
- Heavy duty forks and frame
- Yale Smart Lift™
- Less downtime

**MP20 - 30X – 2000 - 3000kg
(Platform low lift pallet truck)**

- Increased productivity
- Ergonomic tiller head and controls
- Large operator platform
- Exceptional manoeuvrability
- Maintenance free

15

TRAFFIC MANAGEMENT

Speedy Hire provides professional traffic management solutions including; traffic modelling and design, site surveys, major projects, high speed traffic management and solutions for large scale events.

With a wealth of experience behind our teams, we are able to provide a full bespoke service.

- Third party liaison
- Multi-way temporary traffic signals (2/3/4/4+ way)
- Lane and road closures
- Dual carriageway lane closures
- Diversion schemes
- Contraflow works
- Convoy systems

- Stop/go working
- Manually controlled lighting
- Site surveys/on site meetings
- 3D CAD Traffic management plans
- Permit drawings
- Swept path analysis

THE RANGE

- High speed solutions
- Low speed solutions
- Project management, consultancy and design
- Major projects
- Pedestrian management and safety solutions
- Event management

MOST POPULAR

INSTABOOM

The UK's first solar/hybrid work-zone barrier with a collapsible 4m boom. Lightweight, quick to deploy, HSE compliant, UKCA marked, and equipped with remote telematics. Ideal for highways and large events needing fast, efficient vehicle access control.

- Reliable solution with up to 150 opens per day/night
- Anti-contact laser safety beam
- 800m rugged radio remote control
- Overhead protection, mains top up and key code, swipe or GSM access upgrades available

RADIOLIGHT

A versatile product, well suited to a range of traffic flow situations. Radiolight has multiphase, double-head and pedestrian capabilities. It is powered by x3 12v batteries, which should be exchanged weekly. SRL Solar PLUS can be utilised to improve battery cycle duration.

- 32 channel radios
- Vehicle detection
- Red light monitoring
- Single or multiphase trailers available with electrics

URBAN64

The first intelligent temporary traffic light with permanent technology, enabling bespoke layouts for safe vehicle, cyclist, and pedestrian flow. Quickly and reliably replicates permanent systems during installation, repair, or refurbishment.

- MOVA-enabled for optimized junction efficiency
- Multiple phases: filter, cyclist, and walk-with-traffic
- 48v mains-powered cabling with 6.5m clearance
- Remote monitoring and programmable for up to 64 signals

SMART MESSENGER VMS

This compact, full-colour VMS is perfect for directing pedestrians, traffic, or displaying branding and ads. Designed for urban areas and roads up to 60mph, it's ideal for events, venues, airports, and seaports, providing clear public and safety information in any setting.

- 80x48 pixel resolution with 4-line, highways-compliant text
- Live journey time, radar speed detection, and display
- Anti-glare lenses and solar panel for 14-day runtime
- Telescopic jacks for easy levelling

16

ON-SITE HAZARD CONTROLS

Speedy Hire can supply dust extractors, fume extractors, noise barriers, ventilation, heating, cooling, monitoring and water treatment equipment to contractors all around the UK.

By providing superior health hazard control equipment, exceptional expertise and outstanding service, we believe that we can achieve a world where the impact of site work on life, health and the environment is effectively zero.

THE RANGE

- Noise
- Dust
- Fumes
- Exhaust
- Ventilation
- Climate
- Monitoring
- Confined space
- Water treatment

MOST POPULAR

RAVEX® PORTABLE WELDING FUME FILTRATION UNIT

This is a lightweight portable welding fume filter solution, ideal for the removal and filtration of light to medium weld fumes. With its filter nozzle on a magnetic stand, the Ravex® portable welding filter is highly precise, making it a great solution for small, confined, or difficult to access areas. It is not only quiet, but has a high filter efficiency of 99% to 10µm. This unit is ideal for those who need a portable weld fume filtration unit that is compliant with HSE guidance.

VENTEX® CENTRIFUGAL FAN 200P

The Ventex® 200P is a compact centrifugal fan, designed to provide powerful ventilation or extraction in situations which have a low power supply. This makes it ideal for ventilating small areas with limited access, or when used in reverse configuration, is ideal for extracting and filtering dust and fumes from a range of tasks. The centrifugal design means the airflow does not pass over the motor, making it suitable for hot, flammable or abrasive applications.

DUSTEX DUSTMASTER® PRO

The DustMaster® Pro has been designed to virtually eliminate dust migration. Simply position the DustMaster® Pro outside of the sealed work area, and run the ducting and capture hood to where the dust is being produced; when the unit is switched on it will achieve an airflow of up to 2500m³/ph (when used with 3 stages of filter media), thereby creating a negative pressure environment, and ensuring zero dust migration outside of the work zone.

SOUNDEX® CUTTING ENCLOSURE

A high performance acoustic enclosure with internal lighting, a cutting deck and a dust extraction vent.

Quickly creating a stand alone cutting zone within a site, the Soundex® cutting enclosure has versatile capacity for long lengths of material, thanks to its unique left and right ports. The cutting enclosure also features internal lighting and a cutting deck which is ideal for chopsaws. The unit also has a vent, enabling you to use the unit in conjunction with a Dustex dust extraction and filtration solution - creating an all-in-one dust and noise control solution.

17

HYBRID POWER

We provide solar and electric powered products which are sustainable, environmentally friendly, cost-efficient and easy to use.

Our advanced hybrid power systems combine renewable energy source, such as solar and electric. This combination allows for optimised power generation, reducing the need for continuous generator use. By minimizing fuel consumption and enhancing energy efficiency, our hybrid solutions lowers CO2 emissions and noise pollution while delivering reliable power for any application.

POPULAR PRODUCTS INCLUDE:

- EV chargers
- Solar pods
- Solar generators

MOST POPULAR

SOLAR POD

The Solar Pod harvests the sun’s free energy to provide a sustainable power source by combining solar PV, battery storage, a back-up generator and a 400 litre fuel tank in a safe and secure self-contained unit. Great for sites of all sizes, just one Solar Pod can power up to five accommodation units using its impressive power output of 50 - 60kVA.

SOLAR HYBRID GENERATOR

A state-of-the-art sustainable power solution, great for remote sites such as construction, railway and roadworks. Using the Solar Hybrid Generator you’ll benefit from a reduction in CO₂ emissions, reduced fuel costs, reduced noise pollution and reduced generator run time. With every unit hired, as a combined package, customers will receive a smart Erica Energy management tool to provide real time monitoring and data capturing.

ELECTRIC VEHICLE CHARGER

Fully weatherproof electric vehicle chargers offering a cost-efficient, environmentally friendly way to charge your vehicle whilst on site. These free-standing units can charge any electric vehicle through a single power output of 7kW to ensure fast and effective charging.

SPEEDY HIRE SOLUTIONS

WELDING TECHNOLOGY SOLUTIONS

POWERED BY THE UK'S NO. 1 HIRE COMPANY

Welding Technology Solutions specialises in supporting operational shutdowns and year round maintenance projects, offering you a low risk 'one call' solution for total control of equipment and consumables to maintain and operate your plant.

"Whether executing an unplanned breakdown or a large, planned outage Speedy's service is first class. With expert technical knowledge, unrivalled support and a top quality hire fleet, Speedy has proven key in allowing us to meet our customer milestones. A value added service we all need in our industry."

ADAM HARRISON, GE POWER

LLOYDS BRITISH

INDUSTRY-LEADING EXPERTS IN LIFTING, INSPECTION AND TEST FOR OVER 200 YEARS

Lloyds British is a multi-disciplined lifting and compliance business, consistently ensuring customers remain safe and meet statutory and regulatory obligations.

We're proud to be a Speedy business and with their industry-leading range of equipment hire and sales, supported by extensive health and safety training, we can ensure the successful delivery of customer projects by limiting project downtime through the option to hire or buy replacement assets.

SPEEDY HIRE SOLUTIONS

TRAINING

INDUSTRY-LEADING SAFETY AND SKILLS TRAINING FROM SPEEDY

Whenever you're working at height or operating a crane at Speedy Training we provide exactly the right training to enable you to operate efficiently, and above all, safely.

By providing the correct training you require we help you to ensure you or your employees are not injured or made ill by the work they do and go home safe every day.

With the use of bespoke, blended or eLearning offerings we can design your training around your needs and our training courses cover a range of safe use and awareness topics.

EQUIPMENT AND CONSUMABLE SALES

YOUR PARTNER FOR THE PURCHASE OF PRODUCTS, MATERIALS, TOOLS AND ACCESSORIES

Our National Distribution Centre for product sales carries a wide range of stock from market-leading brands and offers competitive pricing with proven, reliable logistics solutions.

In addition to 8,000 lines of core stock, our extensive supply chain guarantees access to a broad range of products to meet your needs.

We currently have 36,000 items within our supply network.

Speedy Sales offers simple transactional purchasing, through to tailored e-commerce supply solutions, reducing waste from the purchasing process.

MYSPEEDY

Save time, take control and reduce queries on the go and 24/7 with the simple to use and completely secure new and improved MySpeedy management tool.

NEW - Real time data for your Speedy Account Management Team

NEW - User friendly dashboard and interface

Off-hire with a few simple clicks

View, download and print your invoices, proof of deliveries and proof of collections

View your order history

Pay your invoices
