

# FPOD PLUS

**5,331 - 9,213 LITRES**

The fPod Plus 5300L and 9000L units offer you the superior security and versatility for stationary fuelling applications. Featuring a full height lockable cabinet with additional shelving space and secure hose access, these bulk storage units are your solution for long term construction projects and plant yards. The tanks come with a Tecalemit 240v Fuel Management System, providing efficient fuel monitoring and data reporting. The 5300L unit is equipped with a 60 lpm dispensing pump whilst the 9000L unit is equipped with an 80 lpm dispensing pump.

## FEATURES

### COMPLETE PACKAGE

Fuel management system complete with cloud service package for easy data analysis.

### ADDITIONAL STORAGE

The full height cabinet can hose pumps, reels, hoses, connections while also storing oil cans and other fuelling equipment.

### TOP MOUNTED FITTINGS

Top mounted fittings to prevent leakage of fuel.

### LOCKING SYSTEM

High security locking system to protect your liquid assets.

### ACCESS HATCH

Easy access to inner tank for routine maintenance and cleaning.

### LIFTING EYES

Lifting eyes for easy handling (empty only).

### FULLY BUNDED

The cabinet spill sump contains any spills or drips. The tank is 110% banded to comply with oil regulations. Manufactured to BS799 part 5 for above ground oil storage.

### MESH FLOOR

Removable mesh floor for easy access to clean sump to catch any diesel drips.

### BEARERS

Tank supplied with bearers for easy placing in position and moving if required (when empty).

## IDEAL USES AND APPLICATIONS

### BULK FUEL STORAGE

fPod Plus tanks can be used to refuel vehicles, construction machinery and agricultural equipment efficiently. This range is ideal for large equipment fleets that require constant fuel storage on site - allowing significant cost savings with purchasing of fuel.

### FUEL MANAGEMENT STATION

The fPod Plus is a single refuelling point solution for any site, servicing every fuel user and contractor. The service reduces vehicle movements and fuel containers on-site, with environmental, safety and cost benefits for all users.

### FUEL SECURITY

With the fPod Plus you have full control of your fuel. Fobs and Pin codes are utilised to track who is using the fuel and which piece of equipment is being filled - preventing potential theft and fuel waste.
